Determination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osogawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial EcoRI digestion of Drosophila DNA provided by the BDGP from the isogenic strain y2; cn bw sp. the same strain used for the BDGP's Pl and EST libraries. A more detailed description of the library and how to order individual BAC clones, the entire library. Or filters for hybridization from the BACPAC Resource Center can be found at http://bacpac.med.buffalo.edu/drosophila_bac.htm.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          10
                                                                                                                                                                                                                                                                                                                       Determination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial EcoRI digestion of Drosophila DNA provided by the BDGP from the isogenic strain y2; on bw sp, the same strain used for the BDGP's Pl and EST libraries. A more detailed description of the library, or filters for hybridization from the BACPAC Resource Center can be found at http://www.speace.com/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosophila/prosop
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      TAMTAC 910

Determination of this BAC-end sequence was carried out as part of a collaboration with the European Drosophila Genome Project (EDGP) - http://www.edgp.ebi.ac.uk - This Drosophila melanogaster BAC library (Dros BAC) was made by Alain Billaud at CEPH (Centre d'Etude du Polymorphisme Humain) with funding provided by a MRC project grant. The DNA was prepared from embryos by Alain Bucheton
